DETAILED ACTION

Response to Amendment

1. The present Office action is made in response to the amendment filed on 8/28/2009. It is noted that in the amendment, applicant has made changes to the specification and the claims.
2. Regarding to the specification, applicant has submitted a substitute specification with its marked-up copy showing the changes to the specification, and a statement that the substitute specification does not contain any new matter.
3. Regarding to the claims, applicant has amended claims 1, 5, 9 and 12-16 and canceled claim 10-11. There is not any claim being added. As a result of the changes to the claims, the pending claims are claims 1, 4-9 and 12-16. Note that claims 2-3 were canceled in the amendment of 3/23/2009.

Election/Restrictions

4. The amendments to claim 9 in which the amended claim contains allowable subject matters are sufficient to place the claim and its dependent claims in condition for allowance. Thus, non-elected claims 9-16 are no longer withdrawn from consideration because the claim(s) requires all the limitations of an allowable claim. As a result, all pending claims 1, 4-9 and 12-16 are examined in this Office action.
5. In view of the above noted withdrawal of the restriction requirement, applicant is advised that if any claim presented in a continuation or divisional application is anticipated by, or includes all the limitations of, a claim that is allowable in the present

application, such claim may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application.

Once a restriction requirement is withdrawn, the provisions of 35 U.S.C. 121 are no longer applicable. See *In re Ziegler*, 443 F.2d 1211, 1215, 170 USPQ 129, 131-32 (CCPA 1971). See also MPEP § 804.01.

Drawings

6. The replacement sheet contains figures 10A-B was received on 3/23/09. The replacement sheet is approved by the examiner. As a result of the changes to the drawings as provided in the amendment of 3/23/09 and the pre-amendment of 2/14/06, the application now contains six sheets of figures 1-6 and 12 as filed on 2/14/06, five replacement sheets contained figures 7A-B, 8A-C, 9A-C, 11A-C and 13 as filed with the Pre-amendment of 2/14/06, and one replacement sheet contained figures 10A-B as filed on 3/23/09.

Specification

7. The lengthy specification which was amended by the amendment of 8/28/09 has not been checked to the extent necessary to determine the presence of all possible minor errors. Applicant's cooperation is requested in correcting any errors of which applicant may become aware in the specification.

8. The substitute specification filed on 8/28/2009 has been entered.

Claim Objections

9. The objections to claims 1 and 4-8 as set forth in the previous Office action have been overcome by the amendment to the claim 1.

10. The amended claim 9 as provided in the amendment of 8/28/2009 still contains some problems of 35 USC 112, second paragraph and need to be amended. In particular, there are two problems occurred in the claim 9 need to be amended as follow:

First, the feature “the optical axis of the condenser” appeared on line 9 does not have a proper antecedent basis. Applicant should note that the similar problem was corrected by the applicant as can be seen in the claim 1, line 10; and Second, the feature “the hold member” appeared on line 13 of the claim does not have a proper antecedent basis and also the feature thereof “the first fit portion fits the hold member” appeared on line 13 is confused with respect to the feature thereof “a first fit portion that fits the rotation shaft” recited on line 11 of the claim.

Both the mentioned problems are corrected by the examiners as provided below.

EXAMINER’S AMENDMENT

11. An examiner’s amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

The application has been amended as follows:

In the claim(s):

In claim 9: on line 7, changed “the optical axis” to --an optical axis--; and
on line 13, changed “the hold member” to --the rotation shaft--.

Allowable Subject Matter

12. Claims 1, 4-9 and 12-16 are allowed.
13. The following is an examiner's statement of reasons for allowance:

The objective lens as recited in the independent claim 1 and the condenser as recited in the independent claim 9 are patentable with respect to the prior art, in particular, the Japanese reference No. 10-31164 and the Germany reference No. 34 09 657 by the limitations related to the shield mechanism for varying an incident area of a dark field illumination. It is noted that the use of a shield mechanism for such a purpose is disclosed in each of the mentioned reference; however, the cited art does not disclose that the shield mechanism having the following features: a) a plurality of shield plates layered in the direction of an optical axis of an optical system; b) the shield plates are opened/closed by rotation about the optical axis; c) each of the shield plate includes a first fit portion fits the cylindrical surface of a hold member or a rotation shaft and a second fit portion that fit an adjacent shield plate and causes the shield plates to be rotated together as claimed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
